abrahan silverio

full stack web developer

Full-stack web developer with over 10 years of experience, detailed-oriented, and liable with a combination of knowledge, flexibility, and problem-solving skills to provide solutions with the latest technologies and best practices.

I understand how the web works, having a solid understanding of Javascript and PHP allows me to develop static and dynamic websites with the most popular frameworks such as Laravel, VueJS, React, Angular, and others, as well as creating plugins, themes/templates for CMSs like WordPress and Joomla.

In addition to my technical skills, I am a solid team player who can work to tight deadlines and has plenty of initiative to deal with unexpected problems.
